

# KOSHA GOHIL

## Cloud & DevOps Engineer | AWS | Terraform (IaC) | CI/CD | Security & Reliability

United States | (551) 330 1256 | [gohilkosha@gmail.com](mailto:gohilkosha@gmail.com) | [linkedin.com/in/kosha-gohil/](https://linkedin.com/in/kosha-gohil/) | [github.com/KoshaG0hil](https://github.com/KoshaG0hil)

### PROFESSIONAL SUMMARY

**DevOps & Cloud Engineer** with 4+ years of experience designing, automating and operating AWS infrastructure in HIPAA-regulated, high-availability production environments. Strong expertise in **Terraform, IAM, CI/CD automation**, and **event-driven architecture**. **Proven track record of improving deployment reliability** by 30%, reducing AWS costs by 25–30%, and strengthening security through infrastructure as code, monitoring, and operational best practices

### PROFESSIONAL EXPERIENCE

#### Cloud Security Engineer | Woodhull Rx Center, New York

Jan 2025 - Present

- Designed and operated secure, event-driven AWS architectures (Lambda, S3, Glue, EventBridge) supporting HIPAA-regulated pharmacy data workflows with encryption, audit logging, and least-privilege access
- Re-architected IAM permission boundaries and execution patterns for production workloads, reducing AWS computer and access-related costs by 25–30% (~\$3K–\$5K monthly) while maintaining compliance
- Built Python-based automation to validate IAM permissions and detect configuration drift, reducing recurring security issues by ~40%
- Provisioned and managed Terraform-based infrastructure across dev, stage, and production environments, eliminating environmental drift and improving scalability and deployment consistency by ~40%
- Integrated security and compliance guardrails into CI/CD pipelines, enabling repeatable, auditable deployments and accelerating release cycles by ~30%
- Established production observability using CloudWatch logs, metrics, and alarms, improving incident detection and minimizing impact to pharmacy operations

#### Cloud Support Associate | Filmy AI, Remote

Oct 2024 - Jul 2025

- Operated and stabilized AWS microservices (Lambda, API Gateway, EC2), improving deployment reliability and reducing production incidents by ~30%
- Supported end-to-end CI/CD workflows, owning pipeline troubleshooting, failure recovery, and deployment stabilization, reducing resolution time by ~35%
- Automated environment provisioning using Terraform and Python, eliminating manual setup effort by ~40% and accelerating feature delivery timelines
- Orchestrated containerized workloads using Docker and Amazon ECS/EKS, ensuring high availability, scalability, and consistent runtime behavior in production
- Enabled AI-backed cloud services by integrating model APIs into asynchronous inference workflows, increasing platform scalability by ~25%
- Collaborated with application and data teams to resolve infrastructure, deployment, and runtime issues impacting customer-facing services

#### Network System Engineer | Skyline Developers. Ltd, India

Jul 2020 - Apr 2022

- Engineered and operated enterprise network infrastructure (routers, switches, VLANs, firewalls), improving hybrid cloud reliability and performance by ~30%
- Designed, deployed, and maintained secure VPN connectivity (pfSense, Cisco), enforcing access controls and reducing connectivity-related incidents by ~25%
- Diagnosed and resolved routing, latency, DNS, and packet-loss issues, improving overall system uptime and operational stability by ~35%
- Collaborated on AWS and Azure VPC/VNet integrations, reducing network misconfigurations across routing, NAT, and firewall layers by ~40%

## PROJECT EXPERIENCE

**Secure ML Data Pipeline & Access Control (AWS)** -Built and controlled a HIPAA-compliant ML data pipeline using AWS S3, Glue, and Python, enforcing least-privilege IAM, encryption, and audit logging to reduce data exposure risk by ~35% and improve compliance by ~40%

**Terraform-Based Multi-Environment Infrastructure Automation** -Planned reusable Terraform modules to provision AWS infrastructure across dev, stage, and prod, eliminating environment drift and improving deployment consistency and scalability by ~40%

**Cloud Usage & Access Anomaly Detection**- Developed Python-based analytics to detect anomalous AWS access patterns and cost spikes, reducing investigation time by ~35% and improving operational security and cost governance by ~40%

## CERTIFICATIONS

- [AWS Certified Solutions Architect – Associate](#)
- [AWS Certified Cloud Practitioner](#)
- [CompTIA Security+](#)
- [HashiCorp Certified: Terraform Associate \(004\)](#)
- [CCNA](#)
- [AWS Certified Machine Learning – Specialty \(In Progress\)](#)

## EDUCATION

**Master of Science [MS] in Computer and Information Systems Security** | Pace University, New York | GPA: 3.91  
**Bachelor of Engineering [BE] in Computer Engineering** | University of Pune, India | GPA: 3.16

**May 2024**  
**Jul 2021**

## TECHNICAL SKILLS

- **DevOps & Infrastructure as Code (IaC):** Terraform, Docker, Kubernetes, CI/CD Pipelines (GitHub Actions, GitLab CI, Jenkins), Amazon ECS, Amazon EKS, Infrastructure as Code, Trivy, SonarQube, Snyk
- **Cloud platforms:** AWS (EC2, Lambda, S3, ECS, EKS, IAM, VPC, CloudWatch, EventBridge)
- **Security & Compliance:** IAM, KMS, Secrets Manager, OAuth2, SAML, HIPAA, SOC 2
- **Networking:** VPCs, VPNs, DNS, Load Balancing, Firewalls | **Automation & Scripting:** Python, Bash, AWS CLI
- **Data & ML:** DynamoDB, Redshift, Snowflake, Kafka, Secure ML Pipelines
- **Observability & Reliability:** CloudWatch Logs, Metrics, Alarms, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), OpenTelemetry, Monitoring, Alerting, Incident Response
